Lucknow, Uttar Pradesh, India 226028

## PROFESSIONAL SUMMARY

B.Tech Information Technology graduate with hands-on experience building scalable full-stack web applications using the MERN stack, JavaScript, Python, and AWS. Strong foundation in Data Structures & Algorithms, Object-Oriented Programming, SQL, RESTful APIs, and Git. Passionate about developing secure, high-performance software and solving real-world engineering challenges in collaborative Agile environments.

## TECHNICAL SKILLS

**Languages & Databases:** Python, Java, JavaScript (ES6+), C++, HTML5, CSS3, MongoDB Atlas, MySQL

**Frameworks:** React.js, Node.js, Express.js, Redux Toolkit, Tailwind CSS, Vite

**Cloud & Tools:** AWS, Git, GitHub, Google Search Console, Power BI, Netlify, Google Analytics

**Core Concepts:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Network, RESTful APIs, SDLC, Agile, Authentication & Authorization, Debugging, AI/ML Fundamentals

## EDUCATION

**B.Tech (Hons.) in Information Technology** (*Specialization: Cyber Security*) | BBDEC, Lucknow | **CGPA: 8.65/10** | **2022–2026**

## PROFESSIONAL EXPERIENCE

**Web Developer Intern** | September 2025 - December 2025 | 12-weeks

- Engineered responsive web applications using React.js, Next.js, and TypeScript, achieving a 92 Google Lighthouse Performance score and reducing page load time by 25% through dynamic code splitting and frontend optimization.
- Collaborated in Agile sprints using Git, GitHub, code reviews, and CI/CD pipelines, accelerating feature delivery by 15% and reducing post-deployment defects by 18% through collaborative development and version control best practices.

**Data Analytics Virtual Job Simulation** | Deloitte - February 2026

- Executed data analysis during Deloitte Australia's Data Analytics Virtual Job Simulation (Forage), leveraging Excel functions to classify structured datasets, uncover business trends, and deliver actionable recommendations across 2 client-based scenarios.
- Built an interactive Tableau dashboard featuring 5+ analytical visualizations to monitor operational performance, highlight key insights, and support stakeholder decision-making in a simulated consulting engagement.

## PROJECTS

**Meesho Clone — MERN Full-Stack E-Commerce Platform** — *React.js, Redux Toolkit, Tailwind CSS, Node.js, Express.js, Mongo DB*

- Architected a production-ready MERN e-commerce platform with JWT authentication, role-based access control (RBAC), and Razorpay payment integration, delivering secure checkout workflows and supporting 100% secure online transactions.
- Engineered scalable RESTful APIs using Node.js, Express.js, and MongoDB Atlas, implementing CRUD operations, authentication, input validation, and centralized error handling to improve API reliability and reduce response latency by 30%.
- Optimized frontend performance using Vite, applied technical SEO best practices, generating 20,000+ organic impressions across 150+ countries, while deploying production builds on Netlify with Git/GitHub-based version control and CI/CD workflows.

**Comfy — AI-Powered Mental Wellness Platform** — *React.js, Node.js, Express.js, MongoDB, AI Integration, Gemini 2.5*

- Architected an AI-powered mental wellness platform using Gemini API, conducting 10-question AI-driven assessments, generating 0–100 personalized stress scores, and delivering tailored wellness recommendations based on user responses.
- Developed secure RESTful APIs with JWT authentication, dashboard analytics, and assessment history tracking, implementing 5+ core features to deliver AI-powered recommendations, persistent user records, and a scalable user experience.

## CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate
- Software Engineering Job Simulation — JPMorgan
- Google Cyber Security Professional by Coursera
- TCS iON Career Edge — Young Professional
